#### **DETAILED ACTION**

#### Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 25-55 have been renumbered as 26-56 respectively. *Claim* 

## Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- 3. Claims 1-56 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Saiki et al., (Saiki), JP 2001272542.
- 4. Saiki discloses in the abstract and shows in Fig. 1, a liquid crystal display, comprising a liquid crystal cell (5), and a polarizing plate with an optical compensation film, comprising a polarizing plate (1), an adhesive layer A2, an optical compensation film (3), and an adhesive layer B4, laminated to one another,

wherein the polarizing plate comprises a polyvinyl alcohol polarizing film containing a dichroic substance (page 2, paragraph 0013), and

wherein an elastic modulus of the adhesive layer A is not greater than 0.06 MPa

Application/Control Number: 10/071,270

Art Unit: 2871

(abstract).

Accordingly, claims 1, 11, 21, 23, 39 and 41 are anticipated.

As to claims 2-4, 12-14, 22, 24, 25, 40, 42 and 43, Saiki also discloses that the elastic modulus of the adhesive layer A is at least 0.02 MPa and at most 0.05 MPa (page 1, paragraph 0006) and the elastic modulus of the adhesive layer B is at least 0.08 MPa and the still more desirable elastic modulus of the adhesive layer B is at least 0.09 MPa and at most 0.12 MPa (page 1, paragraph 0007).

As to claims 5, 6, 15, 16, 26-29, and 44-47, Saiki also discloses that both the adhesive layer A and the adhesive layer B are adhesive agents comprising an acrylic resin and have a thickness in a range of at least 10  $\mu$ m to at most 40  $\mu$ m (pages 1-2, paragraph 0012).

As to claims 7, 17, 30 and 48, Saiki also discloses that a triacetyl cellulose film is formed integrally with at least one surface of the polarizing film (page 5, paragraph 0049).

As to claims 8, 9, 18, 19, 31, 32, 49 and 50, Saiki further discloses that the optical compensation film comprises a film with an oriented liquid crystal polymer and wherein a triacetyl cellulose film is integrally formed with at least one surface of the optical compensation film (page 5, paragraph 0050).

As to claims 10, 20, 33-38 and 51-56, Saiki also discloses that at least one selected from the group consisting of a reflecting plate, a semitransparent reflector, a retardation plate, a  $\lambda$  plate, and a brightness enhancement film is further laminated to the polarizing plate (page 2-3, paragraph 0022-0023, 0027).

Application/Control Number: 10/071,270 Page 4

### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a) USPAT 4,025,688 is related to a reflective light-polarizing lamination comprising a light polarizer laminated to the matter surface of aluminum foil.
- b) USPAT 4,268,127 is related to a polarizer useful for a liquid crystal display comprising a transparent or semi-transparent resin film, an adhesive layer and/or semi-transparent particles.
- c) USPAT 4,387,133 is related to a laminated light-polarizing sheet.
- d) USPAT 4,810,523 is related to production of acrylate based pressure-sensitive adhesives.
- e) USPAT 5,880,800 and USPAT 6,331,882, assigned to the common assignee of the instant invention, is related to an optical film and liquid crystal display.
- f) USPAT 6,404,469, assigned to the common assignee of the instant invention is related to wide viewing angle polarizing plate and liquid crystal display.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tarifur R Chowdhury whose telephone number is (703) 308-4115. The examiner can normally be reached on M-Th (6:30-5:00) Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William L Sikes can be reached on (703) 305-4842. The fax phone numbers for the organization where this application or proceeding is assigned are (703)

Application/Control Number: 10/071,270
